Healthcare News and Deals - February 3rd, 2025

1. Angitia Biopharmaceuticals raises \$130M Series D in Frazier Life Sciences and Venrock Healthcare Capital Partners-led round with Ascenta Capital, BVF Partners, Logos Capital, RA Capital Management, Wellington Management, and Bain Capital Life Sciences to advance bone disease bispecifics

Angitia Biopharmaceuticals' new funding will advance three bone disease candidates through clinical trials: AGA111, a recombinant BMP-6 in phase 3 for spinal fusion, and bispecific antibodies AGA2118 and AGA2115 targeting osteoporosis and osteogenesis imperfecta. These dual-mechanism therapies aim to increase bone density by enhancing formation and reducing resorption. ([Link](#))

2. Midi Health closes \$100M Series D in Goodwater Capital-led round with Foresite Capital, Serena Ventures, Advance Venture Partners, GV, Emerson Collective, SemperVirens, and McKesson Ventures to scale national women's health platform

The new funding will expand Midi Health's virtual women's health platform serving 230,000 patients nationwide through 500 providers. The company is broadening services beyond menopause into metabolic, weight, and musculoskeletal care while using AI for operations. It reports lower care costs and improved outcomes, with plans to grow Medicare and Medicaid access. ([Link](#))

3. Third Arc Bio closes \$52M Series A extension led by Andreessen Horowitz with Omega Funds, Goldman Sachs Alternatives Life Sciences, BVF Partners LP, T. Rowe Price Associates, AbbVie Ventures, and Alderline Group to expand oncology and immunology portfolio

The extension funding will accelerate its immunology and inflammation pipeline and advance oncology programs into clinical trials. Its lead candidate, ARC101, a CLDN6-targeting bispecific, is in Phase 1 for solid tumors. The ARCTag Platform localizes immune modulation at disease sites, enhancing efficacy beyond systemic therapies. ([Link](#))

4. Chamber raises \$60M Series A led by Frist Cressey Ventures with General Catalyst, AlleyCorp, American Family Ventures, Company Ventures, Optum Ventures, Healthworx Ventures and Black Opal Ventures to scale cardiology value-based care

The Series A funding will expand Chamber's cardiology-focused value-based care platform, which uses workflow-native AI to prioritize high-risk patients and optimize guideline-directed therapy. Supporting 500+ cardiologists across seven states, the company will grow health plan and practice partnerships, enter new markets, and build clinical and technology teams. ([Link](#))

5. Alaffia Health raises \$55M Series B led by Transformation Capital with FirstMark Capital, Tau Ventures, and Twine Ventures to tackle healthcare's administrative waste problem

The funding will scale its agentic AI platform that evaluates claims against complete medical records for health plans, delivering 20%+ savings on facility claims and 5x+ ROI. The system combines expert clinicians with 97%+ accurate AI extraction to reduce review times from weeks to days, addressing healthcare's administrative waste problem. ([Link](#))

6. Lotus Health AI raises \$35M Series A co-led by Kleiner Perkins and CRV to offer free, insurance-free doctor visits

Lotus Health AI's funding will scale its sponsorship-based platform offering free, insurance-free doctor visits supported by physician-validated AI. The system aggregates medical records and wearable data to detect underdiagnosed conditions like autoimmune disorders. Automating intake and administrative tasks, it provides 24/7 multilingual clinical support while enhancing physician productivity. ([Link](#))

7. Phylo raises \$13.5M seed round led by Andreessen Horowitz with Anthology Fund, Zetta, Conviction, SV Angel, and others to develop AI-powered biology software

Phylo's funding will scale Biomni Lab, an AI platform providing ChatGPT-like access to 82 biology tools, 68 databases, and 100+ software packages through natural language commands. The platform automates data movement between tools, distributes tasks across multiple GPUs, and visualizes molecular models. Adopted by 4,300+ organizations including 18 top pharmaceutical companies. ([Link](#))

8. beHuman raises \$4M seed round led by Santé Ventures with DHVP.io to scale AI-driven early cancer detection platform

beHuman's funding will scale its physician-led platform combining virtual care, diagnostic testing, and agentic AI that automates eligibility verification, scheduling, and follow-up for underserved populations missing cancer screenings. Achieving detection rates exceeding national averages, the company will expand beyond current U.S. regions, deepen laboratory partnerships, and grow virtual care teams. ([Link](#))

Events:

1. February 18th - 20th TMC AI Summit 2026

TMC AI Summit 2026, held February 18-20 in Houston at Texas Medical Center, brings together researchers, clinicians, and industry leaders. The summit features presentations, workshops, and tutorials on data science, AI informatics, biomedical discovery, clinical deployment, and ethical AI frameworks in healthcare innovation. ([Link](#))

2. February 22nd - 25th ViVE 2026

ViVE 2026, held February 22-25 in Los Angeles, convenes 9,000+ health IT executives, including 2,000+ C-level leaders from providers, payers, and innovators. Attendees explore AI, interoperability, cybersecurity, value-based care, and digital health through dedicated zones, matchmaking, panels, and the Startup Pavilion. ([Link](#))

3. March 5th - Empowering Smart Communities: An AI and Policy Workshop for Resilience Planning

The event will be held in Chapel Hill, NC at Innovate Carolina. HDIG is producing this workshop with Onix, UNC, the City of Chapel Hill and Google. The goal of this conference/workshop is to show community leaders how to use technology to anticipate and respond to disruptions more effectively and efficiently.
