

Healthcare News and Deals - June 8th, 2025

1. Mayo Clinic and Microsoft (NASDAQ: MSFT) Collaborate to Develop a First-of-Its-Kind Frontier AI Foundation Model for Healthcare Using Mayo's De-Identified Clinical Data and Microsoft Azure Foundry

The frontier AI model will be owned by Mayo Clinic, reinforcing patient trust and clinical governance, while Microsoft plans to make the model available through Azure Foundry APIs, enabling organizations worldwide to access advanced healthcare AI capabilities. [Link](#)

2. Yuzu Health Raises \$35M Series A Led by General Catalyst and Chemistry, with Anthropic's Anthology Fund and Bain Future Back Ventures, to Modernize Health Insurance TPA Infrastructure with AI-Automated Claims Processing

The company is investing in automating historically manual workflows including claims adjudication, stop-loss submissions, reconciliation, bookkeeping, and downstream reporting, enabling more customizable plan designs such as direct contracts, cash payment, and dynamic copays without legacy operational complexity. [Link](#)

3. OSF HealthCare Expands Enterprise-Wide Strategic Partnership with hellocare.ai to Deploy AI-Assisted Intelligent Hospital Rooms Across 150+ Locations, with OSF HealthCare as Strategic Investor

OSF HealthCare – a 16-hospital health system employing nearly 24,000 Mission Partners – is also a strategic investor in hellocare.ai, reinforcing the long-term relationship. The deployment aims to transform clinical workflows, patient safety, operational efficiency, and the care experience. hellocare.ai currently supports more than 100 health systems across the United States. 4. WellSpan Health and Philips (AMS: PHIA / NYSE: PHG) Announce Landmark 7-Year Alliance to Co-Develop AI-Powered Imaging Technologies and Diagnostic Innovation Tools

The multi-year agreement signals a deepening integration of AI-driven diagnostic tools into clinical workflows, aiming to improve patient outcomes and expand the scope of what is possible in medical imaging and precision diagnostics. [Link](#)

5. Adaptive Innovations Raises \$50M Series A Led by Felicis, with Bain Capital Ventures and Optum Ventures, to Scale AI Operating System for Home Health Services Across the U.S.

The company built an AI operating system that automates intake, clinical documentation, referrals, and revenue cycle management for home health services. It serves patients on private insurance, Medicare, and Medicare Advantage. Adaptive plans to use the capital to acquire small-cap home health businesses and their licenses. [Link](#)

6. Novellia Secures \$18M Series A Led by Spark Capital, with Khosla Ventures and TMV, to Scale NLP-Powered Patient-Consented Real-World Data Platform Solving Pharma's \$50B Research Problem

Novellia's proprietary NLP models extract signals from unstructured clinical text – including physician notes, lab narratives, and diagnostic reports – converting raw patient data into anonymized, harmonized datasets for pharmaceutical research. Customers include several of the top 10 global pharmaceutical companies. [Link](#)

7. Triomics Secures \$22M Series B Led by Battery Ventures, with Lightspeed, Y Combinator, and Texas Oncology's Precision Health Informatics, to Scale AI Agents for Cancer Data Abstraction and Clinical Trial Matching

The platform uses AI agents to read full longitudinal patient records and convert unstructured data into structured, verifiable outputs delivered into clinical workflows, supporting proactive clinical trial matching, pre-visit chart review, and oncology data abstraction. Triomics works with Memorial Sloan Kettering Cancer Center, MD Anderson, Yale Cancer Center, and Texas Oncology. [Link](#)

8. SOND, Founded by Bose's Former Head of Sleep and MIT Alumni, Exits Stealth with \$7M from MIT's E14 Fund, Crosslink Capital, and Boston Scientific Co-Founder to Launch AI-Coached Dreambuds Sleep Wearable

This sensor data streams to a cloud-based AI sleep coach that selects or generates personalized sleep audio programs, learning user preferences over time. SOND was co-founded by Yadid Ayzenberg, Bose's former Head of Global Sleep, and Amir Lazarovich, former senior engineering manager at Google. [Link](#)

9. Signos Raises \$20M from GV (Google Ventures), Dexcom (NASDAQ: DXCM), and Blue Cross Blue Shield of Alabama's 450 Ventures for FDA-Cleared AI-Powered Continuous Glucose Monitor Weight Management System

As part of the partnership, Signos will be available for purchase directly on Stelo.com. Investors include GV (Google Ventures), Dexcom, and Blue Cross Blue Shield of Alabama via 450 Ventures. The company reports tenfold growth over the past six months, driven by consumer demand for personalized metabolic health solutions. [Link](#)

10. H1 Secures \$40M Strategic Investment from CVS Health Ventures (NYSE: CVS) to Expand AI-Native Provider Directory and Clinical Intelligence Platform Serving 85% of Top 20 Pharma Companies

H1 claims 85% of the top 20 pharma companies and nine of the top ten health plans as customers. The investment follows active collaboration between H1 and CVS on a joint strategic AI roadmap, including an AI model to improve CVS Health's healthcare provider directory. H1 is working to expand its work with health plans, leveraging one of the most comprehensive global datasets of healthcare professionals and combining deep healthcare data with agentic AI workflows.
