

Healthcare News and Deals - July 1st, 2025

1. Trase Raises \$107M Seed Round Led by ARCH Venture Partners, with Red Cell Partners, to Build Agentic Healthcare AI Operating System Deployed at Duke University Health System

In healthcare, it works with Duke University Health System's Division of Cardiology, where its fax-routing agent automates 5,000+ monthly faxes previously hand-sorted by nurses. Early results show triage completed 7.1x faster, saving staff 1,395 hours monthly and unlocking \$285,450 in annual clinical capacity reinvested into patient care. ([Link](#))

2. XCures Lands \$46M Series B Led by Innovius Capital, with Spring Mountain Capital, to Build AI "Clinical Clarity Engine" Structuring Messy Medical Records for Exact Sciences and Caris Life Sciences

Its Clinical Clarity Engine generates automated patient histories and checklists, having processed 300M+ records from 550,000+ locations. Enterprise clients include Exact Sciences (NASDAQ: EXAS), Caris Life Sciences (NASDAQ: CAI), and Novocure (NASDAQ: NVCR). XCures combines home-built ML with commercial frontier models under a proprietary governance framework to reduce administrative burden and speed clinical decisions. ([Link](#))

3. Clair Health Raises \$11.6M Led by Khosla Ventures, with a16z speedrun and 23andMe Founder Anne Wojcicki, for AI Voice-Biomarker Hormone-Monitoring Wearable for Women

It uses voice-based onboarding, training its AI to analyze voice-specific biomarkers to identify a user's menstrual cycle phase after minutes of conversation. The device addresses long-underserved women's health and hormone tracking through noninvasive continuous monitoring, representing a novel application of AI biomarker analysis to female physiology. ([Link](#))

4. June Health Raises CAD\$2.4M with Securian Canada and PointClickCare Founders to Enhance AI-Powered Women's Health Platform

Offered as an employer and partner benefit, June Health delivers personalized, preventative women's care spanning fertility, hormonal health, mental health, menopause, and chronic conditions. Funds will enhance its AI and data infrastructure and expand employer partnerships. ([Link](#))

5. AI Scientist Company Edison Scientific (FutureHouse Spinout) Partners with Population Health Partners, the Team Behind Metsera, to Create New AI-Driven Biotechs

Population Health Partners believes Edison's agents can scale up the creation of new biotechs. The deal reflects growing pharma demand for specialized AI agents that reason independently to accelerate therapeutic discovery beyond generic OpenAI or Anthropic-based tools. ([Link](#))

6. One Brooklyn Health Selects hellocare.ai as Enterprise Partner for AI-Powered Virtual Nursing and Virtual Sitting Across Its Hospitals

The platform continuously analyzes patient activity in real time, letting nurses monitor multiple units simultaneously, reduce adverse events, and cut burnout. hellocare.ai, which supports 100+ US health systems, integrates into clinical workflows to enable proactive intervention. Leaders including CEO Dr. Sandra Scott frame it as advancing safer, more equitable care and building toward the "intelligent hospital room." ([Link](#))

7. SUIC Worldwide Holdings (OTC: SUIC) Signs Strategic MOU with Taiwan's VisionRenu Biomedical to Accelerate AI Biotechnology and Precision Medicine

The non-binding framework covers AI-powered biotechnology, precision medicine, and US capital-market expansion, including a proposed merger. VisionRenu's flagship MagRenu Transcranial Magnetic Stimulation system is FDA-approved for depression, and it is developing ophthalmic laser technologies. ([Link](#))

8. Prosper AI Raises \$30M Series A Led by Andreessen Horowitz (a16z), with Y Combinator and Emergence Capital, to Scale Healthcare Administrative AI Workflow Platform

Its AI agents replace fragmented point solutions, performing insurance verification with 99%-plus accuracy and navigating prior-authorization systems tirelessly. Targeting the \$372B US healthcare administrative market (roughly \$250B deemed wasteful), Prosper's platform expands from scheduling into full revenue-cycle management, embodying a16z's thesis that AI-native platforms will own the end-to-end administrative layer. ([Link](#))

9. Mecka AI Acquires Healthcare Data Startup Docula to Build the Data Layer for Physical AI and Robotics

Though Docula's product was in healthcare, Mecka valued its ability to process massive data volumes to help train robots on human-motion data collected across 12 countries. Mecka, which raised \$60M USD for physical AI, is building the "data and deployment layer" for robotics—repurposing healthcare-grade AI documentation expertise for the growing US robotics market. ([Link](#))

10. Everi Labs (formerly Luder Technologies) Raises Funding from node.vc, Norrsken Evolve, and Inception Fund for AI-Powered Documentation for Prosthetic and DME Clinics

Positioning AI as a documentation assistant rather than a clinician replacement, Everi Labs helps providers generate accurate structured records efficiently, reducing hours of

administrative work per patient. Targeting complex US reimbursement, it frees clinicians to focus on patient care. ([Link](#))

11. Assort Health Scores \$120M Series C Led by Menlo Ventures, with Lightspeed and First Round Capital, Hitting \$1.2B Unicorn Valuation for Healthcare Voice AI Agent Platform

Its proprietary Synapse model draws on 190M patient interactions, 62,000 care protocols, and 1.6M decision pathways, creating a "patient journey memory." Customers like MDCS Dermatology and John Muir Health report 20% higher bookings and 115% labor-capacity gains, with revenue up 20x in 15 months. ([Link](#))

12. Absci Corporation (NASDAQ: ABSI) Prices \$100M Offering with Eli Lilly (NYSE: LLY) and BVF Partners to Advance Generative-AI-Designed Antibody ABS-201

Proceeds will advance ABS-201, Absci's AI-designed anti-PRLR antibody, across androgenetic alopecia (pattern hair loss) and endometriosis. Absci's Integrated Drug Creation platform combines AI models with a synthetic-biology data engine in a continuous feedback loop between algorithms and wet-lab validation, refining designs each cycle. ([Link](#))

13. Chicago Pacific Founders Backs Attune, the Agentic Engagement Platform for Healthcare, to Tackle US Care-Coordination Crisis

Attune's AI serves as an operational layer unifying EHRs, care management platforms, and outreach tools into one coordinated system, deploying omnichannel engagement across preventive outreach, chronic condition management, care-gap closure, and post-discharge transitions. ([Link](#))

14. Ladder Health Raises \$7M Seed Led by Nina Capital, with Hatteras Venture Partners, to Scale AI-Enabled Virtual Pediatric Developmental Care Platform

The platform delivers speech, occupational, physical, and feeding therapy via telehealth, using AI-enabled tools to bring parents and caregivers directly into treatment and extend therapeutic activities into the home. Funds will expand access across North Carolina, Massachusetts, and Maryland, enhance the AI care platform, and deepen partnerships—addressing nationwide provider shortages and long waitlists for children with developmental delays. ([Link](#))

Events:

1. July 12-14 - AHA Leadership Summit 2026 - Denver, CO

The AHA Leadership Summit is an annual flagship conference hosted by the American Hospital Association, bringing together senior health care executives, clinicians and field experts to share innovative approaches to care delivery, financial stability, workforce challenges and community health.

2. July 26 - 28 - Association for Health Care Resource and Materials Management (AHRMM) Conference Health Care Supply Chain - San Antonio, TX

The Association for Health Care Resource & Materials Management (AHRMM) is a professional membership group within the American Hospital Association, focused on health care supply chain and materials management. Its annual conference is a major gathering for supply chain professionals across hospitals, health systems, and industry.

3. September 17, 2026 - Bamberg Health / Southeast Healthcare Innovation Summit - Atlanta, GA

At the **Southeast Healthcare Innovation Summit**, we'll address critical conversations about health system optimization, digital transformation, artificial intelligence, cybersecurity, interoperability, rural healthcare access, population health, and strategic partnerships. We are dedicated to addressing unique regional challenges and unlocking opportunities to enhance healthcare delivery and management. ([Link](#))
