

Weekly Healthcare Technology News & Deals

Seven-day window ending September 28, 2026

Weekly healthcare technology, medtech and life-science investment intelligence

Enveda Raises \$311M Series E Led by Catalio Capital Management to Advance AI-Discovered Medicines

Enveda's financing includes new investors Durable Capital Partners, ICONIQ, Lightspeed, Surveyor Capital, T. Rowe Price-advised accounts and others. The company will use the capital to move three clinical-stage medicines into later development, bring additional inflammatory and metabolic programs into the clinic, and scale PRISM, its AI-native platform for discovering biologically active molecules from natural chemistry. Precision Neuroscience Closes \$250M Series D for Brain-Computer Interface Platform

The oversubscribed round was co-led by Pershing Square Inc., the Ackman Oxman Institute and a leading life-sciences investment fund, bringing total capital raised to \$430M. Precision has completed more than 100 patient procedures across 18 medical institutions and received FDA clearance for its Layer 7 cortical interface, signaling growing institutional confidence in brain-computer interfaces as a clinical technology category. Heidi Secures \$100M Series C Plus \$240M Growth Investment to Scale Clinical AI Agents

Blackbird led the \$100M equity round, with Phoenix Court, Point72 Private Investments and Headline participating; General Catalyst's Customer Value Fund provided an additional \$240M growth investment. Heidi says its AI care platform now supports 2.8 million consultations per week and plans to move beyond documentation into supervised clinical actions across health systems. [Link](#)

Rightway Raises \$155M Series E Led by Francisco Partners for Pharmacy Benefits and Care Navigation

Thrive Capital and Khosla Ventures also participated. Rightway plans to expand the AI capabilities and technology supporting its pharmacy-benefits platform as employers face accelerating prescription-drug costs, creating a significant growth opportunity for alternatives to traditional PBM models. [Link](#)

Biolevate Raises €30M Series A to Scale AI-Native Life-Sciences Operations

RAISE France and Orange Ventures co-led the round, with participation from MSD Global Health Innovation Fund, Station F and EQT Ventures. Biolevate automates knowledge-intensive life-sciences work such as literature review, clinical documentation and regulatory processes; the company says ARR increased 20x over the last year and it now has more than a dozen enterprise customers in production. [Link](#)

Kasvu Therapeutics Raises €30M Series A to Advance Neuroplasticity Drug KTX-0141

Hadean Ventures led the round with Tesi, Innovestor Life Science Fund and other Finnish science investors participating. The financing will move KTX-0141 through IND/CTA-enabling studies and into Phase 1/1b development for major depressive disorder, providing a new test of targeted TrkB potentiation as a neuropsychiatric therapeutic strategy. [Link](#)

Ramona Optics Raises \$25M Series A to Scale Massively Parallel Microscopy

ARCH Venture Partners led the financing with Stealthpoint Ventures and ND Capital. Ramona's multi-camera array microscopy technology captures large, high-definition biological datasets at high throughput, giving drug-discovery and research teams a way to pair imaging scale with AI-based analysis. [Link](#)

UltraSight Raises \$24M Series B2 to Expand AI-Guided Cardiac Imaging Across U.S. Health Systems

Alive HealthTech Growth Fund led the round with Deep Insight, Star51 Capital, Connecticut Innovations and eHealth Ventures participating. The funding will support U.S. commercial expansion and new workflows for ICU and circulatory-support settings, where AI guidance can help more clinicians acquire diagnostic-quality cardiac ultrasound images. [Link](#)

Basalt Health Raises \$20M Series A Led by NEA to Speed Post-Acute Admissions

Frist Cressey Ventures and 25m Health joined the round. Basalt says its AI platform reduced median referral-processing time at Lifepoint Health from 8.5 minutes to 1.2 minutes and will scale across Lifepoint and ScionHealth markets, making post-acute placement a notable target for hospital workflow automation. [Link](#)

Prevision Medicine Raises \$5.4M Seed Round for Functional Precision Oncology Testing

ACE Ventures led the financing with GoHub Ventures, SICTIC and angel investors participating. The company is developing a functional precision-medicine test for hematologic malignancies and solid tumors, with proceeds focused on commercialization—an important signal for technologies that aim to complement genomic profiling with direct treatment-response testing. [Link](#)

Blair Health Raises C\$4.24M Pre-Seed to Extend Specialist-Designed Care Through Generalist Providers

BDC's Thrive Venture Fund, Accelia Capital and Ogaei co-led the first institutional round, with Ontario Centre of Innovation and angel investors participating. Blair encodes specialist assessments, treatment protocols and escalation pathways into clinical software so family physicians and nurse practitioners can deliver specialist-guided care in areas including menopause, pelvic health and urology. Oracle Health Unveils Oncology EHR and New AI Tools for Cancer Care and Revenue Cycle — Becker's Healthcare

Oracle introduced a cancer-specific EHR with AI-generated patient snapshots, tumor-board preparation, guideline-grounded treatment planning and precision-oncology data integration. Becker's also reported five new Oracle revenue-cycle AI capabilities aimed at prior authorization, documentation and denials, illustrating how large EHR platforms are embedding AI directly into clinical and financial workflows that startup vendors must integrate with or differentiate from.
